

## Review .....

Mike has done it again with ***You Can't Do That.*** Because, yes! He can do that – and over the years I have watched Mike do it, succeeding time and again with his successful systemic approach. Mike simply does not know what cannot be done and believes no one who tells him otherwise.

The “O’Haganisms” run thick and fast through this volume. Don’t blink - because every few words portray another great idea. Mike does not waste words, and you will have to concentrate to distil the many lessons from just a few pages.

Around 2010, Mike offered to a few of us to show us how ‘outsourcing’ works in Manilla. So we caught a plane from Brisbane based on nothing more solid than knowing Mike O’Hagan. And Gee smoking Wizards, didn’t he show us what was going on with outsourcing by the big end of town. And we should have guessed (knowing him so well), not only was he generously doing us a great favour with his time (Mike is always generous helping others) but it was also Mike’s test marketing for yet another great little money earner which he still operates today – making heaps of income, having a ball of fun, giving himself plenty of discretionary time, while enjoying the international jet setting life he leads. I know. We have dined with him in “rock star” Rockwell, attended Melbourne Cup parties at the casino in Manilla, and much more – Mike knows how to have fun.

But a word of warning about ***You Can't Do That*** and Mike O’Hagan! Unless you want to overturn all your preconceptions; unless you really **do** want an unfair advantage over your competition; unless you want a great life as well as a great business – do not read this book. It will make you think you have wasted years and a fortune on fees for formal business training – when what you should’ve done is read this little gem, and spent the time building up your own enterprise, and by now you’d have more income, more time and have had more fun in life while achieving even more ... and being in total control over your own sovereign sources of income.

***You Can't Do That*** .... If you dream of starting a business, can’t imagine how, then you must read it.
